## EDUCATION

**Bachelor of  
Computer Science**

**Universitas Klabat  
Faculty Of Computer Science**

**Aug 2019 – Jun 2023**  
**GPA: 3.80** (Magna Cum Laude)

**Relevant coursework:** Computer Programming, Object Oriented Programming, Front-end Web Development, Mobile App Development, Back-end Development, Full-Stack Web Development, Database Management System, Computer Security, System Analysis and Design.

**Scholarship:** Studsi Kabupaten Kaimana 2021/2022 – 2022/2023

**Organization:** BEM/Student Senate-FIK 2020/2021 – 2022/2023, Active member of Matuariwaya Social Club 2019 – 2023, Core Team of Google Development Student Club Universitas Klabat Aug 2022 – Aug 2023.

## EXPERIENCE

**Administrator Tech Supports**      **PT Hasil Karya Sembako, Manado**      **Jun 2025 – Present**

- Executed a full system migration from Mekari Jurnal and DealPOS to Accurate Online and Accurate POS, ensuring data integrity and continuity across accounting and retail operations.
- Developed and managed integrated internal systems for Inventory, Purchase Orders (PO), and Identity and Access Management (IAM) to streamline business processes.
- Managed network infrastructure and security by installing and configuring MikroTik and UniFi devices.
- Deliver comprehensive technical support and troubleshoot hardware/software issues to ensure maximum system uptime.

**Administrator Programming**      **PT Hasil Karya Sentra Pangan, Minahasa**      **Jun 2024 – Jun 2025**

- Managed a team of 3 staff members in platform management tasks and researched new online platforms to fulfill the company's needs.
- Managed the company's online platforms including Google Cloud Platform, Google Workspace, GoDaddy and advanced automation in Trello.
- Developed internal systems for inventory, purchase orders (PO), and supplier payments to improve operational efficiency.

**Staff Programming**      **PT Hasil Karya Nabati, Minahasa**      **Nov 2023 – Jun 2024**

- Collaborated with the team to maintain and optimize the system according to business needs.
- Developed an integrated sales platform system covering POS to e-commerce, including real-time synchronization of stock and prices between POS, website, and online marketplaces.
- Utilized WordPress, WooCommerce, DealPOS, and MidTrans payment gateway to ensure smooth transaction processing and product management.

**Front End Mobile Developer**      **RSUD Samratulangi, Minahasa**      **Aug 2023 – Nov 2023**

- Implementing the user interface (UI) design created by a UI designer into mobile application code.

**Full Stack Developer**      **PT Klabat Tekno Perkasa, Minahasa Utara**      **Jul 2022 – Jan 2023**

- Turn existing UI/UX into working Front-end side of Web Application with pixel perfect accuration using ReactJS Framework.
- Design and program the mobile application database and API with the desired function through NodeJS and NoSQL database using MongoDB.

## PROJECTS

---

### **HK Suite – Internal Company Platform** **Jan 2024 - Present**

Worked as a full-stack developer on multiple integrated modules within the HK Suite platform. Developed spreadsheet-based inventory and purchase order (PO) systems using Google Apps Script and built a supplier payment system using the MERN stack. The platform is integrated with Mekari Jurnal for automated financial synchronization.

### **Donation Platform – Web App** **Apr 2025**

A foundation profile and donation platform built on <https://hasilkaryapeduli.com>. Developed using WordPress with Elementor and WooCommerce and integrated with the MidTrans payment gateway to support secure and convenient donation processing. I handled the entire setup, including page design, donation product configuration, and payment integration.

### **Room Rent – Web App** **Oct 2024**

A web application used by students and campus members to request room bookings. Users can select rooms, required facilities, upload a request letter, and choose the desired date. The approval process is handled by staff and room coordinators. The application was built using native PHP and Bootstrap, with a MySQL database managed through phpMyAdmin. I developed the entire system, including the interface, business logic, and data storage.

### **Teacher Evaluation – Web App** **Sep 2024**

Designed and built a web application where students can evaluate their lecturers for each class. Lecturers and faculty members can view the evaluation results through role-based views. I handled the entire development process, including front-end, back-end, and database setup.

### **Bus Rent – Android App** **Apr 2024**

An Android application built with React Native and Firebase to connect bus rental owners with customers. Rental owners can create accounts and list their available buses, while users can browse and book buses based on their needs. I developed the entire app, including the user interface, system logic, and real-time data handling with Firebase.

### **E-commerce Platform – Web App** **Jan 2024**

I rebuilt an e-commerce website used for selling groceries to 13 company outlets. The site was developed with WordPress, Elementor, and WooCommerce, integrated with MidTrans payment gateway for smooth and secure transactions. Additionally, product stock and prices are synced with DealPOS and various online marketplaces such as Shopee, Tokopedia, and Lazada. I handled everything from interface design, product and inventory management, to payment integration and data synchronization across platforms.

### **Simfoni – Mobile App** **Sep 2023**

Working as a front-end developer, creating a mobile attendance application with geofencing features used by hospital employees.

### **Bapenda Sulut Mobile – Mobile Application** **Oct 2022**

Working as a back-end developer, designing and developing databases and creating APIs for the Bapenda Sulut Mobile Application

## CERTIFICATION

---

### **CCNA: Introduction to Networks – Cisco** **Jun 2022**

Certificate for learning comprehensive introduction to computer networking concepts.
