A Note About Bock Lighting

In 1918, my great grandfather Ben and his brothers started Spero Lighting/Spero Electric with a commitment to high-quality electrical and lighting products, innovation, and unparalleled customer service. For the next 3 generations, the torch passed down the family line, from my grandfather, Manny, to my father, Mitchell, to me, as our dedication to quality, service, and innovation persisted.

In 2009, Bock Lighting acquired Spero Lighting and together we have continued to offer and advance the high-quality lighting products that my family created. We have also successfully grown into other lighting product categories and now design and manufacture lighting for a number of different applications.

- The Iconic Bock RLM Series Fixtures
- Decorative Commercial Fixtures (including, hand blown glass)
- Vaportight Fixtures
- Indoor Commercial Fixtures
- Outdoor Commercial Fixtures (wall, bollards, poles, area, and flood)
- Custom Fixtures

Today, Bock Lighting is both a local and global lighting company. Our products are manufactured in Cleveland, Ohio, and sold worldwide. Our customers range from single neighborhood stores to national and international retailers. They all demand quality, personal attention, flexibility, and value. I am pleased to say that we meet all of their expectations, every time.

I invite everyone to take a look at Bock Lighting products. Our designs are high-quality, our pricing is sensible, and our service is second to none. Quite simply, we offer the lighting solution my family has spent a century perfecting.

Ezra Spero
President

What Makes Bock Lighting Unique?

Bock Lighting delivers high-quality lighting fixtures, exceptional service, continuous innovation, great value, and the ability to fully customize a lighting solution.

High-Quality Lighting Fixtures

Bock Lighting fixtures are constructed from the best commercial-grade materials available and built with great care and craftsmanship. Reflectors are precision spun in aluminum or steel and finished in a thermally-cured polyester powder coat that provides superior durability. Robust components and thoughtful design combine to create the high-quality lighting fixtures delivered by Bock Lighting.

Exceptional Customer Service

Customers of Bock Lighting rave about the company's straightforward sales approach, scheduling flexibility and incredibly short lead times (standard products can be delivered in less than two weeks.) The entire Bock Lighting team is devoted to providing a satisfying experience and will go to great lengths to exceed our customers expectations.

Continuous Innovation

Bock Lighting continues to innovate and improve its products to incorporate industry advancements in materials and technology, without compromising the aesthetics and integrity of the fixtures. Fixtures are compatible with a number of lamp types including LED light sources that offer increased fixture efficiency, long product life, and smooth and even light distribution.

Great Value

Bock Lighting creates great value for customers by delivering high-quality, reliable and cutting-edge products. Bock offers unparalleled customer support, heritage and warranty.

Impressive Custom Lighting Solutions

Designers often turn to Bock Lighting to create fully custom lighting solutions for their projects. From a special color to a unique mounting type or tailored reflector design, every aspect of the lighting fixture can be modified. This incredible flexibility in customization is made possible by the talent and dedication of the Bock team and the company's local manufacturing facility. All Bock Lighting fixtures are manufactured and assembled in Cleveland, Ohio.

▼ Standard Dome on Gooseneck

The Heritage of the Bock RLM Series

The Bock RLM series is iconic in both style and functionality. First developed in the early 1900's to replace the individual overhead lights traditionally used in warehouses and factories, the RLM light fixture, most often characterized by its spun metal reflector and white interior, offered a more efficient lighting solution that provided a broader distribution of light. In 1919, a standard was developed to specify minimum requirements in efficiency, safety, and quality for these types of fixtures. It was called the RLM Standard Specifications for Industrial Lighting Units. The Spero RLM fixture was one of the fixtures to earn the approval of this original lighting standard.

Since then, a number of changes have been made to the Spero RLM series. New metals, materials, painting techniques, and lighting technologies have improved the overall performance and durability of the fixture, without compromising the iconic spun-metal design. Bock Lighting has also expanded the RLM series to include more shapes, colors, lamp types, and mounting options.

With continued innovation, the iconic Bock RLM series now offers:

- Reflectors made of precision spun aluminum or steel.
- A high-quality, thermally-cured polyester powder coat paint for unparalleled durability.
- Higher reflectance values which improve the overall efficiency of the fixture.
- Turned-in bottom beads add strength and prevent the collection of dirt and water on the fixture.
- Compatibility with several light sources including the latest in LED technology.

Powder Coat Finishes

Bock offers a large pallet of standard finishes. All of our finishes are outdoor rated and come with a five (5) year warranty. Bock's standard color codes beginning with G followed by a number. Standard offering is white interior and your choice of exterior color. Further customization can easily be changed by specifying in the part number designations for inside, outside and trim color (see example below).

Specifying Finish:

Outside Color, use lowercase e prefix.

Inside Color, use lowercase i prefix.

Trim Color, can either be Black (BK) or White (WH) and uses the lowercase tr prefix.

Building Part Example

516-iG9-eG10 = 516 Reflector with Silvadillo interior, Dark Green exterior.

516-G10 trBK = 516 Reflector with White interior, Dark Green exterior and Black Trim.

What is Powder Coating?

Powder coating is the process of coating a surface in which a powder is electrically charged to metal. The applied powder is then heated (cured) to its melting point. It flows to form a smooth film which cools to a firm, durable finish very resistant to scratches, cracking, peeling, UV rays and rust.

TRIM FINISH

Add a trim color to the rim of the RLM shade.

-trWH = White Trim

-trBK = Black Trim

Building Part Example: 516-G1-trBK

Lamp Type

Selecting the proper light source for your RLM is key. Bock offers many different light source options to meet your project's needs. The classic medium base socket is standard on all RLMs. We use the highest quality two piece glazed porcelain socket, that will last for decades to come. We also offer the latest in LED technology with a vast selection of light outputs and color temperature. Also available in Compact Fluorescent.

SOCKETS

Lamps by others

MED5	Medium Base Socket, Heavy duty porcelain with spring loaded center contact and lamp grip screwshell.
MOG6	Mogul Base Socket, Heavy duty porcelain with spring loaded center contact and lamp grip screwshell.
MED5MP	Medium Base Protected Socket, Heavy duty porcelain with spring loaded center contact and lamp grip screwshell.
MOG6MP	Mogul Base Protected Socket, Heavy duty porcelain with spring loaded center contact and lamp grip screwshell.
GU24	Allows for Self Ballasted Compact Fluorescent Lamps.

LED

We provide many different LED modules to fit all application needs from high light output to decorative with Jelly Jar. We partner with the best in LED and driver manufacturers to provide efficient, long lasting and quality lighting. Our LED offering is changing constantly, for the latest LEDs see our website www.BockLighting.com/LED.

CREE 

Lamp Type

LMH2D

LED: Cree LMH2D Module

Driver: Osram OPTOTRONIC Dims down to 1% with 0-10V, Universal Voltage, Lutron available.

If dimming is required, add 0-10V to end of part number.

Driver Enclosure: Required on non-Self Ballasted Fixtures, Max distance to driver is 30FT.

Lens: Module has Domed Lens, Not compatible with Jelly Jar or corresponding Cast Guards.

Cooling: Passive

Building Part: LMH2D-Lumens-Kelvin-Dimming

	Wattage	Lumens	Kelvins	CRI
LMH2D-850LM-XXK	10W	850	27/35/40K	90+
LMH2D 1250LM-XXK	16W	1250	27/35/40K	90+
LMH2D-2000LM-XXK	25W	2000	27/35/40K	90+
LMH2D-3000LM-XXK	37W	3000	27/35/40K	90+

2000LM & 3000LM only available
on Reflectors 18" Diameter and above.

LVE

LED: Bridgelux Vero or Cree CXB COB with 80 CRI standard & 90 CRI option available.

Driver: Philips Xitanium, Dims down to 1% with 0-10V, Universal Voltage, Lutron available.

If dimming is required, add 0-10V to end of part number.

Driver Enclosure: Required on non-Self Ballasted Fixtures, Max distance to driver is 30FT.

Lens: Requires Jelly Jar for outdoor use, flat lens can be used for indoors.

Compatible with Cast Guards. Works with 41 & 42 Jelly Jar Sizes.

Cooling: Passive

Building Part: LVE-Lumens-Kelvin-CRI-Dimming

Wattage is based on 80 CRI.

	Wattage	Lumens	Kelvins	CRI
LVE-850-XXK-XXCRI	8W	850	27/30/35/40K	80/90

Only with 42 Size Jelly Jar
and Metro Series

Lamp Type

LVF & LVX

LED: Bridgelux Vero or Cree CXB COB with 80 CRI standard & 90 CRI option available.

Driver: ERP Driver, 120V, Triac Dimming, Max distance to driver is 30FT.

Driver: LVF: Goes inside 2-1/8" deep jbox.

LVX: Goes above Jelly Jar, extends glass down by 1in.

Lens: Requires Jelly Jar for outdoor use, flat lens can be used for indoors.

Compatible with Cast Guards. Works with 41 & 42 Jelly Jar Sizes

Cooling: Passive

Building Part: [LVF-Wattage-Kelvin-CRI](#) or [LVX-Wattage-Kelvin-CRI](#)

Wattage is based on 80 CRI

Lamp Type

LUTRON AVAILABLE

Lutron drivers are available in our LMH2, LVE, and LBA Modules. Lutron is known for providing the highest quality in lighting components. Dimming levels down to 0.1% with Hi-lume Premier drivers. Fixtures with Lutron have a more pleasant feel with Soft-on and Fade-to-Black dimming technology. Smart systems are available with software capable of mining data from digital EcoSystem drivers.

Add the following suffixes to add Lutron to a LED Module

Suffix	Wattage
PEQ0	Hi-lume Premier 0.1% Ecosystem, Universal Voltage
LDE1	Hi-lume 1% EcoSystem with Soft-On, Fade-to-Black, Universal Voltage
LTE	Hi-lume 1% 2-Wire LED Driver Forward-Phase, 120V Only
LDE5	5-Series EcoSystem, 5% Dimming, Universal Voltage

COMPACT FLUORESCENT

Ballast: Universal Voltage Max Distance from Ballast is 12FT

Socket: 4 Pin GX24q-4 Base, Lamp included with fixture.

CORD MOUNT CANOPY

- > For use with LED drivers and CFL ballasts.
- > Powder coat finish. White or black to match cord standard.
- > Mounts to recessed wiring box. (Box by others.)
- > cULus Listed for Damp Locations.

Building Part: BCC6C-Cord Color-Finish

BCC6S

RIGID MOUNT STEM CANOPY

- > For use only with 1/2" or 3/4" stem mounted fixtures. Stem sold separately.
- > For use with LED drivers and CFL ballasts.
- > Finished in polyester powder coat.
- > Mounts to recessed wiring box. (Box by others.)
- > cULus Listed for Damp Locations.

Building Part: BCC6S-Thread Size-Finish

Mounting Stem

640 CANOPY

Stem mounting available for 1/2" and 3/4" N.P.T. pipe. Canopy is held in place with a slip ring. Canopy is 5 5/8" Dia. x 1" deep. Kit for mounting to 4" octagon box included. To order stems see below. Reflectors ordered with stems and canopies are factory wired and are suitable for damp location. Be sure thread sizes of canopy, stem and reflector hub all match. NOTE: If installed outdoors use a thread sealant on all threads.

- 640-2 = 1/2" NPT Canopy
- 640-3 = 3/4" NPT Canopy

Building Part: 640-Thread Size-Canopy Finish

642 CANOPY

Stem aligner is 5 5/8" Dia. x 1" deep. Self aligning aluminum die cast aligner fits 4" octagon box or Bock cast boxes and accommodates 1/2" or 3/4" N.P.T. pipe. Maximum travel 45°. Be sure thread size of canopy, stem and reflector hub all match. NOTE: If installed outdoors use a thread sealant on all threads.

- 642-2 = 1/2" NPT Canopy with Aligner
- 642-3 = 3/4" NPT Canopy with Aligner

Building Part: 642-Thread Size-Canopy Finish

STEMS

Pipe 1/2" or 3/4" threaded N.P.T. both ends.

Stem Length	Cat.# Stem Size	
	1/2" Pipe	3/4" Pipe
12"	ST2-12	ST3-12
24"	ST2-24	ST3-24
36"	ST2-36	ST3-36
48"	ST2-48	ST3-48
60"	ST2-60	ST3-60
72"	ST2-72	ST3-72
96"	ST2-96	ST3-96

Additional lengths available on request, Consult Factory. If installed outdoors use a thread sealant on all threads. Be sure thread size of reflector and stem both match.

Building Part: STThread Size-Length-Finish

Mounting Pendant

Add Color Code to the end of any of our Cord Canopy sets to get color cords.

Bock Lighting now offers cord color options beyond standard black and white, allowing designers to achieve a greater degree of coordination when choosing pendant fixtures mounted with a cord canopy solution. Available in eleven (11) colors, 18 gauge 3 conductor cord. Simply add the designated color code to the end of the cord canopy product number to order a cord in any color shown here.

Gooseneck Pipe Brackets For Outlet Box and Wall Mounting

Gooseneck Brackets made of 3/4" schedule 40 aluminum tubing threaded 3/4-14 N.P.T. on fixture end. These brackets are designed for recessed box or surface outlet box mounting. The bracket end slips into cast box cover plate (wall end is unthreaded). The pipe may be cut down, in the field, to shorten bracket length. RLMs supplied with these brackets are Underwriters Laboratories Inc.® Listed for Wet Locations' provided they are installed in accordance with local and national codes. If installed outdoors use a thread sealant on fixture end threads to prevent water entry.

Globe Enclosures

Some RLM Series reflectors may require an enclosure around the lamp or light source for aesthetics, utility, or safety. Bock Lighting offers several styles and colors of enclosures, including globes, jelly jars, wire guards, and die cast aluminum guards. For more information on when an enclosure is necessary, use the Product Builder feature on the product pages of the Bock Lighting website.

Customization? We can help!

At Bock, customized projects aren't exceptions, they're business as usual. We regularly work with designers to develop custom solutions and we recognize that each project has its own unique challenges and demands.

Some of the most common customization requests include:

- Unique mounting solutions
- Variations in color or finish
- Changes to trim styles
- Aesthetic tweaks to existing products
- Custom configurations from scratch

Please send your custom request to
support@bocklighting.com (BIM, IES and CAD files) or give us a call (216) 912-7050
