

# CONTROLLER BULLETIN

---

**Bulletin:** vZDC-RDU-B-20260126

**Applicability:** RDU ATCT/TRACON Controllers

**Effective:** 21 January 2026

**Expiration:** 31 May 2026

**Reference:** vZDC-RDU-P-01F, dated 21 January 2026

**Contact:** vZDC/ATM

## **Subject: East & West Final Radar Position Identifier**

---

**PURPOSE:** This bulletin maintains the RDU East/West radar final position identifiers to the Revision E designations. This is necessary until vZDC Academy lessons and scenario files can be modified to the new change.

**PROCEDURE:** East Final Radar will use the identifier "1U" and West Final Radar will use the identifier "1Y." The Revision F of the SOP will refer to these sectors using the new designations of 1F and 1G, respectively. When finals are deconsolidated, finals will be combined to East Final Radar at 1U. West Final Radar (1Y) will be combined with 1U when not deconsolidated. Use "U" or "Y" to initiate an automated handoff in STARS when handing off to the respective final.
