Summary

An experienced software developer with a strong background in building full-stack web applications. Proficient in the TypeScript ecosystem, working with technologies such as Next.js, React.js and Node.js. Skilled at working both independently and within collaborative, cross-functional teams, with hands-on experience in Agile development methodologies. Many of my projects stem from my own needs and frustrations, fueling my passion for using technology to create solutions that make a meaningful impact on my life and the lives of others.

Skills

Typescript, Nextjs, Nodejs, Tailwind CSS, PostgreSQL, Postman, Burp Suite, Git, PHP

Experience

Front End Developer

Pragama Tech Solutions • Remote
06/2024 - Present

- Translated Figma designs into responsive, pixel-perfect web pages using Next.js and Tailwind CSS, ensuring the final product matched design specifications across all screen sizes.
- Integrated different API endpoints to connect dynamic data with reusable components.
- Wrote and executed Playwright tests to ensure consistent and seamless user experiences across different browsers, improving site reliability.
- Collaborated with cross-functional teams to develop the front end of an ERP system for a milk processing company, contributing to streamlining their internal processes.

Full Stack Developer

Ethio IT Hub Discord Server • Freelance, Remote
06/2023 - Present

- Developed and deployed 4 Chrome extensions, including a credit card generator, a face-to-sticker image converter, a photo restoration tool, and an image/PDF format converter.
- Deployed applications on a Linux server, configuring ports, setting up firewall rules, and managing resources to ensure smooth and reliable performance using pm2 process manager.
- Integrated advanced AI image generation models from Replicate to enhance product functionality and deliver AI-powered features.
- Ranked #1 on the leaderboard, earning the most within the community and consistently delivering high-quality solutions that meet client needs.

Personal Projects

1. Freelance Ethiopia Clone

This project is aimed at creating a clone of Freelance Ethiopia's web application with additional features and improvements to enhance the user experience, specifically targeting my personal pain points. As a frequent user of their platform for finding jobs, I often encountered various inconveniences related to both the UI and functionality. Instead of simply complaining about these issues or wishing for certain features, I challenged myself to tackle them head-on and find solutions.

Tech Stack - React 18, Supabse, TanStack Query, Tailwind CSS

2. Arada Dictionary

Arada Dictionary is a crowd-sourced online resource for Amharic slang words and phrases. Have you ever found yourself lost in unfamiliar slang words in conversations? You're not alone. That's why I've created Arada Dictionary. It's a platform where people like you and me can contribute and discover the meanings of slang terms commonly spoken in different cities across Ethiopia.

Tech Stack - Nextjs 14, Tailwind CSS, Auth.js, PostgreSQL, Zod, Prisma

---

Education

Ethio Italy Poly Technique College | Bachelor of Science | Information Technology | 2019 - 2024

Certification

Certification

I completed Cisco's Networking Basics course and earned the Cisco student-level credential. I demonstrated proficiency in various networking concepts, including understanding the types of networks, their functionality, data transmission processes, network cabling, IP address usage, and the operation of transport and application layers. Furthermore, I applied my knowledge by building a home wireless network and engaged in up to 13 Cisco Packet Tracer activities to reinforce practical skills.
