Experience

Full Stack Developer Intern – Weframetech
April 2023 — July 2023

- Built responsive web application using ReactJS and Nodejs to improve the user experience of a company's website.
- Learned new technologies like zustand and react-query, which improved the performance and scalability of the web application.

Projects

anime-next
anime-next.online

- Discover and track your favorite anime and manga
- Built with Nextjs , Used features like RSC , SSR , server action , Caching to render web pages faster
- Learned about OAuth flow to integrate third-party authentication into app , Used Graphql to fetch data from third-party sources

goodgit
https://github.com/shaik-zeeshan/goodgit

- manage multiple git user with goodgit
- It uses Commander.js to build a cli and uses SSH method to handle the multiple user

Education

BE in Computer Science
Lords Institute of Engineering & Technology 2024

Skills

Typescript
Golang
Python
React.js
Nextjs
PostgreSQL
MERN
Express.js
Tailwindcss
Github
Graphql
SQL

Tools

HTML / CSS
Javascript / React
httpie / Postman
Zed Editor
