COMBIFLEX

The **ELEKTROSVIT COMBIFLEX** universal low-voltage switchboards with circuit breakers are a flexible and economical solution, expertly developed to ensure reliable electricity distribution for currents up to 4000A. They offer a versatile approach to complex electrical solutions by integrating proven European and global switching and protective equipment, with options for copper or aluminum busbars. The durable black or galvanized metal cabinet is protected by powder coating, and its efficient current distribution system utilizes vertical power busbars in a side compartment alongside horizontal busbars for rational flow.
