PROFILE

Junior Laravel Developer skilled in building RESTful APIs, authentication systems, and scalable web apps using PHP, Laravel, and MySQL. Passionate about clean architecture and backend optimization

EDUCATION

2021 – Present **Higher institute for engineering and technology in tanta (THIET)**
Faculty of Engineering

TECHNICAL SKILLS

• Languages

- PHP
- JavaScript
- HTML
- CSS

• Databases

- MySQL

• Frameworks

- Laravel
- React.js
- Bootstrap

• Tools

- Git
- Postman
- XAMPP
- NPM / Node.js

CERTIFICATE & INTERNSHIPS

08/2025 – 09/2025

Web development using php

Information Technology Institute (ITI) - (120 hours)

- Gained solid knowledge of HTML, CSS, and JavaScript for building interactive user interfaces.
- Learned how to create responsive and mobile-friendly designs using Bootstrap.
- Developed strong skills in PHP programming (procedural & OOP).
- Built complete web applications using the Laravel framework following the MVC architecture.
- Designed and managed MySQL databases, including creating tables, relationships, and optimized queries.
- Worked with RESTful APIs for data exchange between front-end and back-end systems.
- Implemented authentication, authorization, and middleware for secure user access.
- Applied form validation, sessions, and error handling in real-world scenarios.
- Utilized Git and GitHub for version control and team collaboration.

- Integrated AJAX and JSON for dynamic, real-time front-end communication.

07/2025 – 08/2025

Full stack web development using php [↗](#)

NTI collaborated with ITIDA (120 hours)

- Fundamentals of HTML5, CSS3, and JavaScript for front-end development
- Building responsive layouts using Bootstrap framework
- Server-side programming with PHP (OOP concepts)
- MySQL database design, normalization, and queries (CRUD operations)
- Working with RESTful APIs and JSON data exchange
- Authentication & Authorization using Laravel
- Form validation, session management, and middleware logic
- Introduction to MVC architecture and separation of concerns
- Building and consuming APIs in full-stack projects

PROJECTS

08/2025 – 09/2025

Chef Recipes – Laravel MVC Application (ITI Final Project) [↗](#)

A modern recipe management system built with Laravel MVC architecture, featuring web and API support, responsive Tailwind UI

- Full CRUD operations for recipes with image handling
- Admin dashboard with user and recipe management
- Device-based favorites system using cookies
- User authentication and profile management
- Newsletter subscription and admin notifications
- Dual architecture: Web (Blade) + API (JSON)
- Role-based access control (Admin/User)
- Service & Repository pattern for clean code structure
- Responsive glass-morphism UI
- Optimized for performance, scalability, and maintainability

07/2025 – 09/2025

Hilmak - AI Dream Interpretation Platform (Full stack) [↗](#)

AI-based bilingual dream interpretation platform using Laravel, React, and Gemini.

- AI-driven dual dream analysis (Islamic + Psychological)
- Secure user authentication with JWT and role-based access
- Subscription tiers (Free / Paid / Premium) and dream history archive
- RESTful API, MySQL database, and multilingual RTL support
- Responsive modern UI using Tailwind CSS and Radix UI
- Strong data protection (validation, CSRF, rate-limiting, encryption)
- Deployment-ready architecture with caching, CDN, and PWA optimization

Tech Stack: Laravel | React (TypeScript) | MySQL | Tailwind CSS | JWT | Gemini AI
