ABOUT

Hello, my name is Žan Žlender, and I am a software developer with 3 years of experience in fullstack web application development and cloud infrastructure management. I am focused on solving technical challenges and constantly exploring new technologies to provide innovative solutions to users. In addition to working on technological projects, I enjoy sports, music, cooking, and camping. I am ambitious, eager to learn, and adaptable to various work environments, while my communication skills and team spirit make it easy for me to collaborate with colleagues and clients.

WORK EXPERIENCE

Software Developer
2021. – Present

- Designed the user interface for an educational web application using Figma and developed the system architecture from the ground up
- Utilized key technologies and tools such as NextJS (React), GitLab, Jenkins for CI/CD, and a DigitalOcean Linux VPS for self-hosting the application and managing the PostgreSQL database, along with a custom MinIO server for file storage, all deployed with Docker
- Responsible for ongoing maintenance, optimization, and enhancement of the application

Operator and IT support at a call center
2020. – 2021.

- Provided customer consultations and successfully sold solar systems in the German market
- Installed, configured, and maintained IT equipment at the center

VOLUNTEER EXPERIENCE

In nearly 4 years of volunteer experience with the international youth organization AIESEC, I held a wide range of roles and responsibilities. I communicated with partners and young people from around the world, led teams of up to 15 people, created and executed national marketing campaigns, and served as a member of the executive board for the Varaždin entity.

Vice president of Customer Experience for Youth
2020. – 2021.

Project manager for Outgoing Exchange
2019. – 2020.

Project manager for Marketing
2018. – 2019.

AIESEC Varaždin, Croatia
