## PROJECTS

### Hospital Management Web Application | Fullstack <https://medical-app-o384.vercel.app/> Nov-Jan 2025

simplifies appointment management, allowing patients to book online video consultations or in-person visits, reducing unnecessary travel and costs. Key features include a booking system, secure patient record access, video conferencing, and service customization. The platform emphasizes data security with compliance to standards like HIPAA and GDPR, ensuring patient privacy and secure communications. It supports real-time notifications, social authentication, With a user-friendly interface, analytics for operational insights, and the ability to scale for hospitals and clinics of all sizes

### Rider Service Mobile Application | Fullstack <https://github.com/pappa6395/react-native-rider> Feb - Mar 2025

A full-stack uber like mobile application using React Native with Expo to create platform to find driver nearby and get a ride by booking system process from setup the starting point to destination from Google places and routes API managing state across the app by Zustand until the payment with Stripe. This platform still provides a seamless users signup/signin by Google Authentication managed by Clerk ensured that the user data can well and secured collected. The interface is just straight to the point book and wait for picking up with its convenience to whom are not familiar with complicated interface helping the company growing the customer rate gaining more revenue and profit so that, the drivers who use our service to serve more customers and get more paid. Therefore, the application would help growing in every segment of this business

### Customer Relationship Management | Fullstack <https://github.com/pappa6395/beauty-property> Mar - Apr 2025

Online Forms allow customers or leads to submit information directly through web or mobile. Automatically, the data-gathering process for inquiries, support, and onboarding reduce manual work and improves accuracy in customer profiles. Sharing tutorials, onboarding videos, or product demos through a video module increase engagement and reduces support burden through self-service learning. Mobile-friendly video access enhances customer satisfaction integrate live chat system allows customers to connect directly with your admin team to improve conversion rates and customer loyalty. Chat history is saved, searchable, and tied to each user for seamless follow-up. Every form submission, chat interaction, or content view is stored and trackable. Admins can review user history, preferences, and behavior to deliver better service.
